MEDI AFRIC®

COMPANY PROFILE

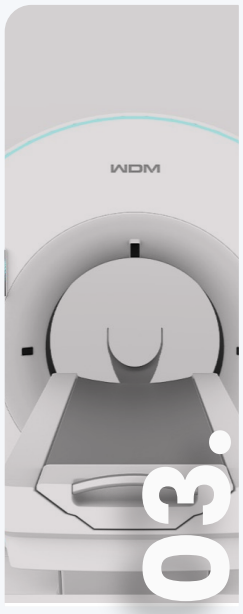

Company Snapshot

A concise overview of scale, geographic reach, and core focus areas.

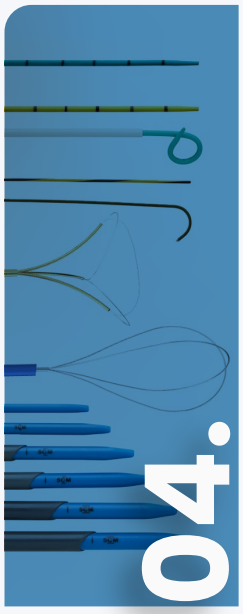

About Us

How Medi Afric operates, partners, and delivers across diverse healthcare environments.

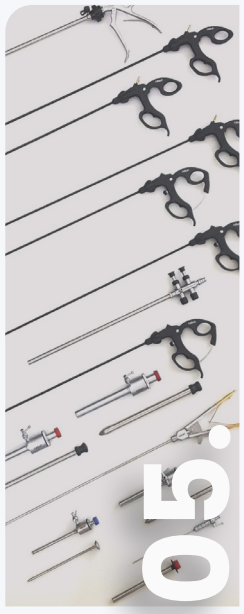

Leadership Team

The leadership driving strategy, regional operations, and execution.

Our History

Key milestones highlighting growth, partnerships, and major achievements.

Regional Presence & Operations

Operational footprint, local presence, and service capacity across Sub-Saharan Africa.

Capabilities & Solutions

Clinical, imaging, and hospital infrastructure solutions delivered end to end.

Technology Partners

Global manufacturing partners supporting Medi Afric's solution portfolio.

Clinical Training & After-Sales Support

Training, technical support, and maintenance throughout the project lifecycle.

OUTLINE

Medi Afric is a healthcare technology and solutions provider operating across Sub-Saharan Africa. Since 2005, the company has supported hospitals and healthcare institutions with medical equipment, imaging systems, minimally invasive surgery technologies, and turnkey hospital solutions tailored to regional needs.

With operations in over 25 countries and offices across key African markets, Medi Afric combines regional knowledge with global manufacturing partnerships to deliver reliable, cost-conscious healthcare infrastructure. The company specialises in Minimally Invasive Surgery, Medical Imaging Systems, and Hospital Systems & Equipment, supporting projects from procurement to installation, training, and after-sales support.

COMPANY SNAPSHOT

info@medi-afric.com | Lebanon | www.medi-afric.com

At Medi Afric, we support healthcare providers across Sub-Saharan Africa by delivering medical technologies, equipment, and turnkey solutions adapted to local operating conditions.

Since 2005, we have worked with public and private healthcare institutions to improve access to diagnostics, surgery, and critical care. Our portfolio focuses on Minimally Invasive Surgery and Medical Imaging, supported by hospital infrastructure and clinical systems.

Through long-term partnerships with global manufacturers, we supply technologies that balance performance, durability, and cost. With teams on the ground across the region, we manage complex projects efficiently while providing ongoing technical and clinical support.

ABOUT US

OUR HISTORY

OUR HISTORY

2005

Incorporation of the offshore HQ in Lebanon

2018

Restructuring and new strategy definition

2019

SSA master dealership for Seesheen GI

2020

SSA master dealership for Quanta System
COVID ICU ventilator contract in Senegal – 1,500,000 USD

2021

TETFUND Nigeria – 8 transplant kidney centers in the North of Nigeria 4,000,000 USD
Medi Afric Nigeria setup

2022

50th unit of Quanta System laser sold in SSA
Turnkey medical gas project in Lusaka Trust Hospital, Zambia – 350,000 USD

2023

SSA master dealership for HAWK. Medical imaging department at Lubumbashi CNSS – USD 4.5M.
Offshore headquarters incorporated in Lebanon.

2024

SSA master dealership for Seesheen urology
DRC MOH contract for 3 medical imaging centers in
40 days – 2,500,000 USD
Staff headcount of 30
Medi Afric Tanzania and Ghana setup

2025

SSA master dealership for Seesheen GI
Cathlab in Lubumbashi CNSS 2,200,000 USD
Two helium free MRI (Nigeria & Conakry)

Special Tools Equipped with Dedicated toolkits & testing equipments

REGIONAL PRESENCE & OPERATIONS

Minimally Invasive Surgery

- Urology lasers
- 4K and HD endoscopy towers
- Flexible gastrointestinal scopes
- Rigid Scopes
- Urology, laparoscopic,
- gynecological, ENT and other
- Specialty instruments
- Implants & surgical disposables

Medical Imaging Systems

- Helium FREE 1.5 Tesla MRI
- Permanent magnet low field MRI
- Complete range of X-ray imaging
- solutions
- Cath lab angiography systems
- Ultrasound systems
- Contrast media injectors
- Printers and media
- PACS and RIS solutions
- Online low frequency UPS
- Radiation protection solutions

Hospital Systems & Eqquipments

- Medical gas systems
- Surgical pendants, ICU and standard bedhead units
- Complete operating room equipment
- Patient monitoring & life support systems
- Medical furniture
- Stainless steel trolleys & utility furniture

CAPABILITIES & SOLUTIONSSS

Minimally Invasive Surgery

- Quanta System
- Shalya
- SEESHEEN
- EMS
- MAP MICROAPPROACH
- Promedon
- HAWK

Medical Imaging Systems

- WDM
- evolucare
- SEACROWN
- MUST
- esaote

Hospital Systems & Eqquipments

- turmed HOSPITAL EQUIPMENT
- NORTHERN MEDITEC
- NIHON KOHDEN
- MECASAN
- TISCOMED HOSPITAL EQUIPMENT
- TECHARTMED

Quanta System

Trusted Across Sub Saharan Africa - The Laser of Choice for in endo urology practice

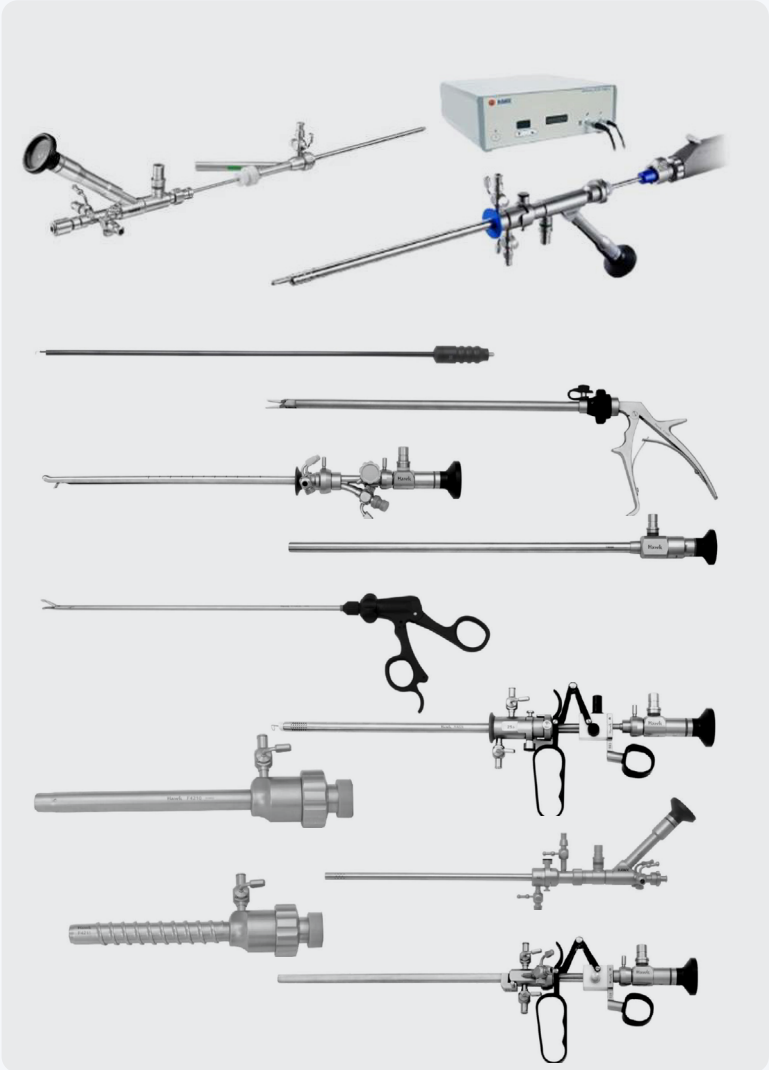

Medi Afric is the exclusive Sub-Saharan Africa master distributor for Quanta System lasers since 2020. We've deployed over 150+ units across the region, supporting customers with local clinical training, and long-term service support.

Quanta System, based in Italy, is a global leader in medical laser technologies, with over 30 years of innovation in Holmium and Thulium fiber lasers.
The company specializes in advanced surgical lasers for stone management, BPH treatment, soft tissue surgery, and
more — making it a gold standard in endo-urological procedures worldwide.

Product highlights:

- High power holmium Magneto in 105 and 152W
- High power holmium Cyber Ho in 105 and 152W
- High power TFL FiberDust in 60W
- Low power Litho EVO in 35W
- Portable low power Litho DK in 30W

HAWK

Reliable MIS Instruments for Everyday Surgery

Medi Afric is the exclusive dealer for Sub-Saharan Africa for Hangzhou HAWK since 2023. Our collaboration brings highquality, affordable rigid endoscopy and MIS instruments to hospitals and surgical centers across the region.

HAWK, based in Hangzhou, China, is a fast-growing global manufacturer of endo urology, laparoscopic and endoscopic surgical instruments.

The company is known for its robust portfolio of urology, gynecology, and general surgery tools — including scopes, trocars, graspers, scissors, and electrodes.

Designed for compatibility and long-term performance, HAWK products are used in over 60 countries and are highly valued by African practitioners, who have relied on them for years for their durability, versatility, and affordability.

Product highlights:

- Rigid endoscopes ranging from Ø 2.7 mm to 10 mm
- Lower and upper tract sets for urology
- HoLEP set & morcellator for urology
- Laparoscopy set for general surgery, uro and gynecology
- Operative and diagnostic hysteroscopy set

Shalya®

Reliable Electrosurgical Solutions for Every Operating Theater

Medi Afric is the preferred partner for Sub-Saharan Africa for Shalya's electrosurgical platforms tailored to minimally invasive surgery. Our collaboration brings reliable and versatile ESUs to hospitals across the region — supporting procedures such as vessel sealing, laparoscopic

coagulation, and bipolar resection (TURP). All systems are backed by local clinical training, technical support, and spare parts availability.
Shalya, based in India, designs and manufactures highquality electrosurgical units (ESUs) for hospitals worldwide.

Their systems are CE-certified, user-friendly, and engineered for both basic and advanced procedures — offering monopolar and bipolar modes, precise power delivery, and advanced safety features.

Widely used in Africa, Shalya ESUs are valued for their durability, intuitive interface, and affordability, making them the go-to choice for public and private hospitals alike.

Product highlights:
- Advanced ESUs with dedicated modes for Lap & URO
- Support bipolar TURP, vessel sealing, and lap dissection

SEESHEEN

Comprehensive Flexible Endoscopy for Diagnosis and Intervention

Medi Afric is the exclusive regional partner for Seesheen flexible video endoscopy systems across Sub-Saharan Africa. Together, we bring cost-effective, high-resolution imaging solutions for gastroenterology, urology, and ENT to public and private hospitals — with local support, installations, and clinical training.

Seesheen, based in China, manufactures flexible video endoscopy systems for real-time diagnostics and therapeutic procedures. Its portable and tower-based platforms support a range of specialties including GI, urology, bronchoscopy, and ENT.

Product highlights:

- Gastroenterology: Flexible video gastroscopes and colonoscopes
- Urology: Flexible ureteroscopes and cystoscopes
- Bronchoscopy & ENT: Flexible bronchoscopes and nasopharyngoscopes

Promedon

Innovative Urology & Pelvic Health Solutions

Medi Afric has been the official regional partner for Promedon in Sub-Saharan Africa since March 2025. Together, we offer a comprehensive range of urological implants, continence devices, and pelvic floor repair systems, supported by local training, surgical assistance, and reliable logistics for both public and private sectors.

Promedon, based in Argentina, is a global leader in urology and pelvic health implants, with over 35 years of innovation. Its CE-certified portfolio focuses on functional urology and reconstructive surgery, trusted by specialists worldwide for its quality and affordability.

Product highlights:

- Male Incontinence: Adjustable slings, artificial urinary
- sphincters
- Erectile Dysfunction: Malleable penile prostheses
- Female Incontinence: Mini-slings, transobturator kits

MEDI AFRIC OEM

Custom-Branded Medical Solutions for African Healthcare

At Medi Afric, we don't just distribute — we design, develop, and deliver select medical products under our own OEM (Original Equipment Manufacturer) label. These products are tailored to the specific needs of healthcare providers across Sub-Saharan Africa, offering the perfect balance of quality, affordability, and regional suitability.

Through long-term collaboration with certified manufacturing partners, we bring Medi Afric-branded solutions to market in fields such as:

Product highlights:

- Endoscopy carts
- 4K monitors
- 4K endoscopy camera systems
- Light sources
- 30 / 40 L insufflators with heat functions
- Suction irrigation unit
- Peristaltic irrigation unit

WDM

Reliable Imaging Systems

Medi Afric is the preferred master dealer for Wandong Medical (WDM) in Sub-Saharan Africa. This partnership ensures access to cost-effective, high-performance imaging systems — including X-ray, CT, DSA units, and contrast media injectors — tailored to meet the diagnostic needs of both urban hospitals and decentralized healthcare centers across the region.

Wandong Medical, based in China, is one of the country's oldest and most established manufacturers of diagnostic imaging equipment. With decades of experience and a presence in over 70 countries, Wandong offers solutions that meet international standards while remaining accessible for developing markets.

Product highlights:

- Helium-free 1.5T MRI systems
- Permanent magnet low-field MRI
- Comprehensive X-ray solutions, including digital radiography (DR), mobile X-ray, mammo and fluoroscopy
- Interventional cath lab angiography systems

esaote

High-Performance Ultrasound

Medi Afric acts as a regional agent for Esaote in Sub-Saharan Africa, promoting and facilitating access to Esaote's advanced ultrasound and dedicated MRI solutions.

We support hospitals and clinics with procurement coordination, clinical introductions, and after-sales followup in collaboration with the manufacturer.

Esaote, based in Italy, is a global leader in ultrasound imaging systems, with a strong focus on portable, cartbased, and high-end platforms. Designed for versatility and affordability, Esaote ultrasound machines are widely used across general medicine, cardiology, OB/GYN, MSK, and vascular imaging.

Product highlights:

- Portable & Cart-Based Systems for clinics, hospitals, and point-of-care use
- AI Imaging Tools for auto-measurement and workflow efficiency
- Wide Probe Compatibility including convex, linear, phased, and endocavitary
- Versatile Applications: General imaging, OB/GYN, cardiology, vascular, MSK

SEACROWN

Advanced Contrast Media Injectors for CT, MRI & DSA

Medi Afric serves as a regional agent for Seacrown in Sub-Saharan Africa, providing access to high-quality contrast media injection systems and consumables.

We support imaging centers and hospitals with procurement coordination, clinical introductions, and after-sales followup in collaboration with the manufacturer Founded in 2002, Seacrown is a Chinese medical device manufacturer specializing in contrast media injection systems for CT, MRI, and DSA applications.

The company developed and produced China's first dual-head CT injector and MRI injector, and holds over 30 patents and software copyrights. With more than 7,000 devices installed worldwide, Seacrown is recognized for delivering costeffective, high-performance solutions for diagnostic imaging

Product highlights:

- CT Injectors: Single & dual-head systems with flow control
- MRI Injectors: Non-magnetic dual-head units for CE-MRI
- DSA Injectors: High-pressure systems for angiography

MECASAN

Complete Medical Gas Infrastructure for Safe and Efficient Care

Medi Afric serves as a regional agent for Megasan in Sub-Saharan Africa, providing access to turnkey medical gas systems designed for hospitals, clinics, and surgical centers. We coordinate project design, equipment supply, and technical integration, in collaboration with the manufacturer, ensuring compliance with international safety and performance standards.

Founded in Turkey, Megasan is a specialist in medical gas pipeline systems, offering complete solutions including plant room equipment, ICU and OR outlets, bedhead units, pendants, and alarm systems. With installations in over 40 countries, Megasan is known for delivering robust, standardized infrastructure that supports safe and efficient oxygen, air, vacuum, and anesthesia gas delivery across all care levels.

Product highlights:

- Oxygen, vacuum, air, and nitrous gas pipeline systems
- ICU and OR pendants, bedhead units, and terminal outlets
- Medical gas alarm panels and zone valve boxes

Durable Medical Furniture

Medi Afric serves as a regional agent for Turmed in Sub- Saharan Africa, providing access to a wide range of hospital furniture and critical care equipment. We support healthcare projects with procurement, customization, and logistics coordination, ensuring high-quality, affordable solutions for both public and private institutions.

Based in Turkey, Turmed manufactures a broad portfolio of patient beds, stretchers, trolleys, examination tables, and ICU equipment. Known for their reliability, ergonomic design, and cost-efficiency, Turmed's products are used in hospitals and clinics across Europe, the Middle East, and Africa.

Product highlights:

- Manual and electric patient beds with side rails and accessories
- Emergency stretchers, ward trolleys, and instrument tables
- ICU and recovery room furniture
- Examination and procedure tables for outpatient clinics

NORTHERN MEDITEC

Smart Patient Monitoring and Life Support Systems for Critical Care

Medi Afric serves as a regional agent for Northern Meditec in Sub-Saharan Africa, offering a range of patient monitors, anesthesia machines, ventilators, and defibrillators. We coordinate procurement, configuration, and clinical followup in collaboration with the manufacturer to ensure safe and effective deployment across hospital settings.

Based in China, Northern Meditec is a global supplier of perioperative and critical care equipment, known for its modular design, touchscreen interfaces, and user-friendly software. Its products are trusted in over 100 countries and comply with international standards including CE and ISO certifications.

Product highlights:

- Multiparameter patient monitors for OR, ICU, and emergency
- Anesthesia machines with ventilator integration and gas monitoring
- ICU ventilators with invasive/non-invasive support modes
- Automated external and manual defibrillators with CPR guidance

TECHARTMED

Versatile Operating Tables for General and Specialized Surgery

Medi Afric serves as a regional agent for Techartmed in Sub-Saharan Africa, supplying high-quality surgical operating tables designed for reliability, safety, and adaptability. We support hospitals and surgical centers with procurement coordination, technical specifications, and after-sales follow-up in partnership with the manufacturer.

Based in China, Techartmed is a specialized manufacturer of manual and electro-hydraulic operating tables, offering solutions for general surgery, orthopedics, gynecology, and urology. Their tables are known for robust construction, smooth positioning, and modular design, ensuring compatibility with various surgical disciplines and imaging needs.

Product highlights:

- Electro-hydraulic and manual operating tables
- Radiolucent table tops for C-arm
- Specialized attachments for gynecology, lithotomy, and orthopedic traction

Durable Stainless Steel Medical Furniture for Hospitals and Clinics

Medi Afric serves as a regional agent for Tiscomed in Sub- Saharan Africa, offering a wide range of stainless steel hospital furniture designed for hygiene, durability, and ease of use. We support healthcare facilities with procurement planning, bulk ordering, and logistics coordination tailored to regional hospital needs.

Based in Turkey, Tiscomed specializes in the manufacturing of high-quality stainless steel medical furniture, used in wards, ICUs, operating rooms, and outpatient clinics. Built to withstand frequent cleaning and heavy use, Tiscomed products combine functionality, clean design, and longterm value for any medical environment.

- Product highlights:
- Instrument tables and Mayo stands
- Dressing and emergency trolleys
- Kick buckets and medical waste bins
- IV stands, step stools, and hamper trolleys

Medi Afric provides on-site user training, workshops, and procedural simulations as part of its project delivery approach. Training sessions are led by biomedical engineers or in coordination with clinical specialists and adapted to hospital workflows.

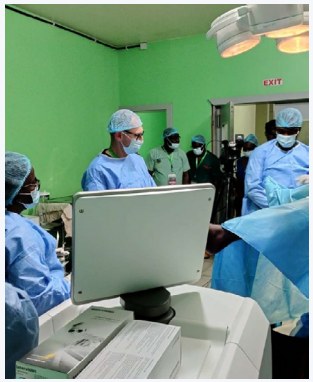

Support includes installation, commissioning, preventive maintenance, and spare parts availability across Sub-Saharan Africa.
